Taking Down Goliath

IMPLEMENTING AN EFFECTIVE INVESTIGATION PROCESS

Incidents happen. While we have processes to assist in preventing injuries, nothing is fail safe. To avoid regulatory citations and claims related to these events, it is important that there be a systematic approach for identifying risks, initiating preventive interventions, and ongoing monitoring. When incidents do occur, it is our responsibility to ensure the investigative process is done timely, consistently, and per industry standards. This program was developed in an effort to encourage providers to evaluate their current internal systems and assist in developing improved practices to prevent unnecessary regulatory scrutiny.

LEARNING OBJECTIVES

- Identify Corporate Compliance processes to assist in developing a comprehensive, effective Corporate Compliance program
- Describe the systems involved in ensuring an effective investigation
- Identify auditing processes that will assist in ensuring ongoing compliance with regulatory requirements
